Professional Summary

Applied AI Developer & Data Scientist

AI developer and certified Data Scientist specializing in Machine Learning, Generative AI systems, RAG architectures, and agentic workflows. Proven track record of architecting and shipping functional, production-ready AI applications from end-to-end, combining rigorous analytical problem-solving with modern AI engineering to automate complex data and document pipelines.

Featured AI Projects & Builds

PaperVision AI | Multimodal Document Intelligence System

- Architected a multimodal vision application leveraging Gemini/OpenAI vision models with a Supabase backend to extract structured data from dense technical documents and research papers.
- Implemented advanced document parsing pipelines and vector indexing to handle unstructured visual layouts, charts, and tables with high extraction accuracy.

InvoiceForge (invoiceforgeapp.com) | Financial Document Automation Engine

- Engineered an automated financial document parser to eliminate manual data entry from invoices, receipts, and billing records.
- Built structured JSON extraction pipelines with schema validation, error handling, and structured data export integrations for business operations.

Data Pilot AI | Autonomous Data Analysis Copilot

- Developed an intelligent analytics assistant designed to automate exploratory data analysis (EDA), statistical validation, and feature preparation pipelines.
- Integrated tool-calling workflows to translate natural language user queries into executable data transformations and visual dashboards.

Professional Experience

- Design and build custom Generative AI prototypes, automated agentic pipelines, and machine learning models for independent product initiatives and clients.
- Implement n8n workflow automations, custom API integrations, and RAG retrieval pipelines using LangChain, CrewAI, and local/cloud LLMs (Ollama, Gemini, OpenAI).

Data Science Intern | CodeAlpha

Remote • Oct 2024 – Nov 2024

- Developed predictive machine learning and deep learning models using Python, Scikit-Learn, and PyTorch/TensorFlow.
- Conducted exploratory data analysis, feature engineering, and time-series forecasting implementations.

QC Chemist | Declan Industries Pvt. Ltd**Ankleshwar, Gujarat • Apr 2021 – Sep 2023**

- Managed precision data collection, calibration, and instrumental analysis (Karl Fischer, FTIR) ensuring strict SOP adherence and zero-defect data integrity.
- Applied systematic root-cause analysis and data validation protocols that form the foundation for modern model evaluation and data quality pipelines.

Technical Skills

- **AI & GenAI Systems:** Agentic Workflows (CrewAI), RAG Architectures, LangChain, Multimodal Vision, Prompt Engineering, LLM Integration (OpenAI, Gemini, Ollama), n8n Automation.
- **Machine Learning & NLP:** Scikit-Learn, PyTorch, TensorFlow, Transformers, NLTK, spaCy, Dimensionality Reduction (PCA, UMAP), Predictive Modeling.
- **Data Engineering & Backend:** Python, SQL, MySQL, Pandas, NumPy, Supabase, REST APIs, Git.
- **Data Visualization:** Matplotlib, Seaborn, Plotly, Power BI.

Education & Certifications

- **Data Science with Generative AI (Masters Program)** – PW Skills (2025)
- **Bachelor of Science in Chemistry (B.Sc.)** – College of Computer, Science & Information Technology, Junagadh (2020)
- **Certifications:** Complete Data Science Bootcamp (Udemy), Complete Python Pro Bootcamp (Udemy), Tata Data Visualization Simulation (Forage).
- **Languages:** English, Gujarati, Hindi
